[www.descom.digital](http://www.descom.digital)

## METHODOLOGY

With a vast experience of near about 10 years, Descom Softwares Pvt. Ltd. understand the core of the Business and the factors that directly or indirectly influence your business and its growth.

Our team of meticulous professionals provides exceedingly advantageous Web and IT Solutions to you.

Our professional IT technicians maneuver the "Work Methodology" to deliver project within the time frame with advanced quality check. They constantly strive for the best output and contentment of your needs and wants.

Through incessant feedback and camaraderie we help your business generate great trade and commerce development providing the desired growth and progress.

## STATIC WEBSITE DESIGNING

Static Websites are more informative than interactive. Our IT technicians design most creative, eye catching, advanced and cost effective Static Website to best suit your business. If you own a small business and your mere intention is to simply mark your online presence and share key information about your business that does not involve interaction from the targeted audience, Static Website is a boon for you.

## DYNAMIC WEBSITE DESIGNING

Dynamic Websites are more resourceful, functional, user friendly, and interactive. Regular updates can be made easily that make your website look more alive and active. Besides, it also enhances your website ranking on all leading search engines. With the help of advanced tools, our expertise IT professionals develop Dynamic Websites which are more interactive, appealing and edifying.

## RESPONSIVE WEBSITE DESIGNING

Responsive Websites are compatible with all advanced and hi tech devices like Mobile Phone, Tablet, Laptop, Personal Computer etc also, it automatically adjust its layout as per the user's device. So, there is no need to maintain multiple websites as one responsive website works with all the devices.
